

Partner & User Testimonials

Orb MyCasting has many loyal fans. Some of the positive feedback Orb has received from its partners and users, via customer surveys, customer emails and its online Orb Community Forum include the following:

"Remote home viewing represents the next frontier in television functionality for consumers using the Diamond PVR and Orb software. Remote viewing of the home television is a quickly growing space, and we're glad to team up with Orb Networks who makes this added functionality a reality for Diamond customers."

-Bruce Zaman, CEO, Diamond Multimedia, Inc.

"With Orb, Hauppauge WinTV users can now watch TV streamed from their home anywhere in the world on virtually any Web-enabled mobile device. This capability provides our customers with an unparalleled amount of freedom and control to watch their favorite shows wherever they may be. This partnership definitely represents the future of placeshifting."

-Ken Plotkin, CEO, Hauppauge Computer Works, Inc.

"Our relationship with Orb Networks is based on the premise that a user is more interested in their personal content and how they can access that content anytime anywhere and have the best possible experience. The combination of Orb Networks and an AMD LIVE! platform will deliver an incredible experience for our users."

-Joe Menard, executive vice president, AMD

"Creative Labs has been a strong believer in the vision of Orb Networks from the beginning. And now, by combining Orb VideoMail with a Creative® webcam, users have the perfect way to make video-based email as simple and as universal as text-based email. From right within the email application you use daily, Orb integrates with Creative webcams – such as the new Live!® Cam Voice – to provide a seamless way to communicate with personalized, high-quality video messages."

-Dr. Jeff Stoen, general manager cameras, Creative Labs

"Orb enables us to join the mobile media phenomenon. Currently, there is no other offering that measures up to Orb and we are excited to offer this service to the region. This strategic partnership with Orb enables us to expand our business into new areas and continue to aggressively grow our network of communities."

-Bill Tseng, CEO, Inventec Besta

"Orb is amazing! The ability to stream so many types of media so easily is unmatched."

-Orb Customer Survey Respondent

"You guys have done a great job making ORB the best thing since sliced bread."

-Orb Customer Survey Respondent

"This app is OFF THE CHAINS!!!"

-Orb Customer Survey Respondent

"I have never left a comment to a web site or software distributor in my life but I think you[r] invention of ORB needs to be commended in what it's all about because it's the best thing that could have happened with my Pocket PC phone. Thank you for you[r] development of your website and software."

-Jeff Okada

"Now there are times when EDGE just won't cut it. Mostly this applies to streaming video. I do a lot of streaming of live TV, music, videos and even images with a nice free little program out there called Orb created by Orb Networks. Orb completely blows Sling Media's Slingbox out of the water but that is ... for a different day."

-Rocco

"I downloaded Orb today and must say I'm VERY impressed. I'm glad I hadn't bought beyond TV. Thanks Orb. This is an AWESOME program. Very Happy. It is hard to think it can get better, BUT it DOES. Keep up the good work. A VERY satisfied customer."

-dmaul3300 in the forums

"Incredible system, folks! Video streaming from my home PC to my Treo 700w works surprisingly well. You really have something special here. Thanks!"

-Orb Customer Survey Respondent

"Orb is exactly what I was looking for. I dreamt of accessing my media content on the road for about 5 years now, thanks for making my dream come true ORB. Keep up the great work!!!"

-Orb Customer Survey Respondent

"I love to share photos with my family. We have a new baby, and it's great to go to grandma's house and show off her photos so easily. Even better ... sometimes I can sneak a few minutes at work to brag to my co-workers!"

-Robert

"Coolest thing I have seen on the web in a long time. Nice job!! I am using an older TV tuner card by i/o magic that uses software for compression and it works great. Orb is awesome. I am telling everyone I know about Orb."

-Orb Customer Survey Respondent

"Now no matter where I am my media is with me. I can log in anywhere and enjoy television, my stored photos or even my mega music library. Orb should be included standard on every PC made."

-Scott

"THANK YOU!!! My Sony Location Free TV is looking more and more obsolete. Since I own a Media Center PC why would I need a Slingbox for that matter. The greatest "little" program out there. Again, thank you."

-Orb Customer Survey Respondent

"Just got back from Kuala Lumpur. Logged onto my Orb and was blown away. My recorded and live TV was terrific, really made being away from the family a little easier. Felt a little closer to home. Great picture and audio. Really nice job guys."

-Orb Customer Survey Respondent

"Orb is the most amazing thing I have ever encountered! I was skeptical at first until I downloaded the application and tried it myself. Now I can be away from my desktop and still have access ... and then some. Orb allows me to share photos and videos with friends and relatives easily, conveniently and quickly. I cannot wait to get the TV features to work so I can watch and record my favorite TV shows remotely. Best of all, its free! Thanks, and great job Orb."

-Orb Customer Survey Respondent

"A new life for my content. With as much time as I spend at work, I tried downloading shows to my iPod ... time consuming. Now I have Orb. Without it, the late nights at work would be boring, and my long trips on the train would be unbearable. With the Skype Add-On, I just cannot believe how useful your product is. Not sure how you provide all this for free, but keep it up."

-Orb Customer Survey Respondent

"You guys are the greatest. I am a Soldier that is deployed away from home but with Internet Access. This has been great for getting the TV I wanted without having to purchase any additional equipment. Except for the occasional power outage at home, the service has been non-stop for me. Thanks."

-Major Jeff Shapiro, U.S. Army
